

Passion School

Discover your passion

Our old human passions seem to disappear as we go through the spiritual awakening process. Where is your passion for a job, a hobby or a political and social cause and creativity? Maybe you even lost your passion for the quest of spiritual enlightenment ?

The feeling of loss of passion can be one of the most challenging parts of our spiritual awakening. We feel lost, dull or sometimes hopeless without passion. The old concepts of passion don't work anymore and you are disappointed when these new activities fail to enthuse or excite you.

In fact you are changing your consciousness and therefore your passion changes as well.

Through this course, you can come to understand the difference between an old energy passion and your soul's true passion. Tobias explains the things that are blocking you and keep you away from your passion. And you will be guided through practical experiences, in which you can release these things. You'll discover that passion is the soul's desire to express its joy, and this joy can be part of everything and anything you choose to do in your life.

If you want to feel into the energies of this workshop: you find a short introduction video (with german subtitles) here <http://www.youtube.com/watch?v=umo-Qirg5RE>.

Beside the content there is an intense energetic process unfolding during the workshop, which allows a profound personal experience in addition to the spoken words.

Seminar language is German, also English if necessary. The workshop includes channeled sessions from Tobias through Geoffrey Hoppe. The channels are on DVD in English language with German subtitles. Each participant will receive a transcript in German (or alternatively in English on request).
